PROFESSIONAL SUMMARY

Passionate and analytical professional actively seeking a Junior Developer role to apply problem-solving skills and a strong foundation in front-end web development (JavaScript, HTML, CSS). Proven track record of leveraging technology to drive process improvements and a keen interest in building intuitive user experiences. Experience includes front-end design/development, data analysis, and process automation, with intermediate SQL knowledge.

WORK EXPERIENCE

Indirect Category Leader	Veritiv Corporation	June 2024 - Present
- Oversee a diverse portfolio of indirect spend categories totaling over \$24M annually. - Develop and deliver monthly Power BI reports (leveraging automated API data feeds from Smartsheet) to monitor savings, cost avoidance, and purchase orders, providing critical insights to stakeholders. This involved scripting/automation to ensure data integrity and efficient reporting. - Lead process improvement initiatives, including developing a Smartsheet WorkApp (a spreadsheet and form-based dashboard) that improved on-time delivery by automating communication of shipment scheduling details.		
Equipment Management Leader	Veritiv Corporation	October 2022 – May 2024
- Led the management of a fleet of over 2,300 material handling equipment (MHE) and light-duty vehicles. - Leveraged Excel and Power BI to develop reports and drive improvements in utilization, maintenance spend, and safety.		
Fleet Analyst	Veritiv Corporation	March 2020 – October 2022
- Supported the management of a 1,300+ vehicle fleet ensuring compliance, safety, and high utilization. - Developed and automated Excel reports to improve fleet utilization by over 15%, reduced idle fuel consumption to under 2.2%, and minimized speeding incidents to less than 1 per 1,000 miles. - Implemented a vehicle camera system, generating automated Power BI reports (via API) and using data to address safety and performance concerns. This project further developed my understanding of data integration and automated reporting.		
Transportation System Manager	Veritiv Corporation	January 2017 – March 2020
Supported 3rd party logistic customer operations by providing them with customized Transportation Management System (TMS) solutions. Customized software and data tracking, offering customers optimized routing and transportation solutions.		

PROJECTS

- Freelance Work (JavaScript, Wix (Velo), HTML, CSS):** Developed key enhancements for atgi-llc.com, including an interactive mega-menu for improved navigation, a dynamic “related resources” display component, and animated number counters. | www.atgi-llc.com | www.ShawnBrown.Dev
- Customer Ratings Web App (JavaScript, Wix (Velo)):** Designed and implemented a web application for collecting and displaying customer ratings, featuring four interconnected widgets: a review input form, an average ratings display, review slider, and a review feed. Utilized the Wix platform, including the Wix Data API and Content Management System (CMS), to store and query customer review data using JavaScript. | www.ShawnBrown.Dev
- Custom Designed Slicers, Animated Counters, Custom Mega-Menus, and more (HTML, CSS, JavaScript, Wix (Velo)):** view www.ShawnBrown.Dev for examples/details.

SKILLS

- Programming Languages:** JavaScript, HTML, CSS, React, SQL
- Tools and Platforms:** Visual Studio Code, PowerShell/Terminal (Windows/Ubuntu), Power BI, Excel, Wix (Velo), Wordpress

EDUCATION

- Bachelor of Science in Business and Economic Development | Abraham Baldwin College | May 2017
- Full Stack Certification (In Progress) | Codecademy | Estimated Completion December 2025
 - Actively exploring TailwindCSS styling, React web-app development, and Node.js for backend development.
